ECO COLLECTION

Where the guitar meets the forest

Two values drive Breedlove—protecting our world’s forests and maximizing acoustic guitar sound. Breedlove’s ECO Collection addresses both. In a visionary feat of engineering, Breedlove has developed a process to integrate three layers of tonewood—sustainably harvested from forests visited by Breedlove owner Tom Bedell—avoiding the soft center core that dampens sound on other laminates. The ECO Collection is ushering in a new era in six-string history. With the Breedlove ECO Collection, for the first time, you can play an environmentally friendly, solid top guitar with vibrant, renewable, sound enhancing EcoTonewood back and sides. New Breedlove Designed in Bend Discovery S, Pursuit Exotic S and all-African mahogany Rainforest S models will feature this fully sustainable integrated tonewood technology. Now, great, affordable, natural sound can be good to the earth, too.

No clear-cut wood is used in any new 2021 Breedlove guitar

Breedlove EcoTonewood—it’s where music meets the trees.

CC

ECO TONEWOODS

Sustainable, integrated tonewood technology, optimized natural sound

With EcoTonewood, Breedlove makes laminate technology sustainable, introducing a resonant core tonewood layer of clear-cut free, individually harvested African mahogany in place of the typical tone-robbing softwoods used in standard acoustic guitar manufacture. Coupled with Breedlove's deep research into revolutionary body shapes; building to target frequencies; and treating each instrument individually, the result is optimized natural sound.

Breedlove EcoTonewood—it's where music meets the trees.

Sitting beneath a clear-cut free, solid wood top, which serves as the sonic engine of every quality guitar, the exterior layer of Breedlove's visionary, sustainable EcoTonewood technology is a beautiful, resonant tonewood veneer.

EcoTonewood's innovative, renewable integrated African mahogany core layer, rich and vibrant, is also a true tonewood; replacing the tone-robbing softwoods of guitars past.

The environmentally friendly interior layer of EcoTonewood is another sound enhancing tonewood veneer —Hawaiian koa, Oregon myrtlewood or African mahogany, depending on the model—matching the instrument's exquisite, thinly finished exterior.

PURSUIT EXOTIC S SERIES

Go Exotic, sustainably! Breedlove has long specialized in offering intriguing alternative tonewoods, introducing, for example, hauntingly figured Oregon myrtlewood to the guitar world 25 years ago. The Pursuit Exotic S Series—featuring Tusq nuts and saddles and Breedlove’s earth-conscious, sonically superior EcoTonewood technology—allows you to affordably experience the pure, nuanced sound and striking visual beauty of exotically alluring myrtlewood, koa and cedar. All four of Breedlove’s revolutionary body shapes are available in a popular all myrtle configuration, with a stunning gloss Tiger’s Eye finish. Specialty instruments like nylon string, 12-string and fretted/fretless bass models are available in elegant Natural and Amber tones. Side-mounted Fishman Presys I electronics (with built-in tuner, volume, contour and phase controls) make amplification a breeze.

Koa - Koa
PURSUIT EXOTIC S CONCERT EDGEBURST CE

\$1,732 MSRP | \$1,299 MAP | \$779 Dealer

PSCN44CEKOKO

To pursue is to “endeavor to attain.” Something ‘exotic’ is at once glamorous and romantic, beguiling. Breedlove’s new Pursuit Exotic S Concert Edgeburst CE—featuring the earth-conscious, sonically superior EcoTonewood technology found in all ECO Collection instruments—is nothing if not beguiling and worthy of endeavor. Hawaiian koa offers a unique brilliance in both its rich sound and in the natural beauty of its tropical grain, which is highlighted here by a contemporary gloss edgeburst finish with tortoise binding. The pioneering soft cutaway Concert body shape is supremely versatile, with koa adding shine to fingerpicked passages and gentle muscle to firmer strumming. Scalloped bracing gives you a nuanced tonal palette typically found only on custom instruments.

Myrtlewood - Myrtlewood

PURSUIT EXOTIC S CONCERTO TIGER'S EYE CE

\$999 MSRP | \$749 MAP | \$449

PSCO42CEMYMY

Myrtlewood, while native to Oregon's Pacific coast, might just be the most 'exotic' of all tonewoods, capturing the deep bass of rosewood, the pure warmth of mahogany and the sweet, glassy treble of maple in one exquisite, visually enchanting package—here under an equally captivating tortoise-bound Tiger's Eye gloss finish. This sustainable acoustic electric Pursuit Exotic S Concerto is all about power, with a room filling sound that responds to your most robust strumming, while being comfortable enough to play for hours. A fast, slim neck and soft cutaway access to every fret let your fingers, and your heart, have their say. Sound better than ever with Breedlove's earth-conscious, sonically superior EcoTonewood technology. Get fierce with a Tiger's Eye!

Myrtlewood - Myrtlewood

PURSUIT EXOTIC S CONCERT SWEETGRASS CE

\$932 MSRP | \$699 MAP | \$419 Dealer

PSCN41CEMYMY

Don't look at the picture! We told you not to look at the picture! Breedlove's enchanting Sweetgrass finish has proven one of its most popular, and now you know why. It makes myrtlewood pop, enhancing, somehow, its already radiant natural beauty! You can bet this tortoise-bound jewel sounds just as good as it looks, especially with Breedlove's sustainable, new earth-conscious, sonically superior EcoTonewood technology. The equally popular, pioneering soft cutaway Concert body shape is comfortable, easy-playing and supremely versatile. Explore myrtle's rosewood-like bass and clear maple-like treble with thumb and fingers or rock its mahogany-like mids with a flatpick. You'll get just the right response either way, with tone, sustain and projection to spare.

RAINFOREST SERIES

Breedlove's new ECO Collection Rainforest S Series of affordably priced guitars honors the sounds of the magnificent, mysterious Congo River Basin—the caws of colorful birds and calls of the chimpanzee. Crafted with Breedlove's earth-conscious, sonically superior EcoTonewood technology, all African mahogany Rainforest guitars bring you a warm, immediate sound with a strong midrange emphasis and a ringing sustain, along with true environmental sustainability! Versatile Concert body Rainforest guitars come in dazzling finishes like Papillon, Midnight Blue, Black Gold and Orchid, and feature Side-mounted Fishman Presys I electronics (with built-in tuner, volume, contour and phase controls).

LU'AU S UKULELES

ECO Collection ukuleles—sustain you can feel in your heart! To relax from his day gig as a master guitar builder, Kim Breedlove used to escape home and burn the midnight oil while dreaming of Hawaii and creating high-end ukuleles from native, bright, yet deep-sounding Oregon myrtlewood, which offers an even richer sound than traditional koa or mahogany. Those groundbreaking designs—developed in his garage workshop and boasting essential sonic improvements alongside remarkably fluid playability—are now made exclusively with Breedlove's earth-conscious, sonically superior EcoTonewood technology, and serve as the basis for a new sustainable series of classy, powerful acoustic and acoustic/electric Breedlove Lu'au Ukuleles.

Myrtlewood - Myrtlewood
LU'AU S TENOR UKULELE NATURAL SHADOW CE

\$465 MSRP | \$349 MAP | \$209 Dealer

LUTU21CEMYMY(2)

Sustainable, solid-topped Breedlove ECO Collection Lu'au S Series myrtlewood ukuleles feature a resonant core tonewood layer of clear-cut free, individually harvested African mahogany in place of typical tone-robbing softwoods for back and sides. Sharing a Pacific Ocean coastline with Hawaiian koa, native Oregon myrtle has a similar bright ping, but borrows some of mahogany's depth and warmth for a unique, powerful ukulele presence. Tenor ukes, the favorite of hailed modern aces like Jake Shimabukuro, have a throaty sonority that appeals to guitar players and a longer 17" scale that facilitates translating hot licks from six strings to four. This Lu'au, in Natural Shadow finish, boasts UK-TI electronics and a soft cutaway for easy play all the way up the neck.
